A Letter to my Patients

I am writing to encourage you to look after your health. I wish to tell you and your friends about my practice, in the hope that you will consult me. My aim is to cooperate with doctors to help the patients they cannot cure, and to avoid the use of drugs and surgery.

I have been in practice since 1984 (and part time in the NHS from 1990-2003). I am a Fellow of the Society of Homeopaths, former editor of our journal for 10 years, Board member for 20+ years and former Hon Secretary. I was a Trustee of the British Homeopathic Association. I have taught homeopathy at the University of Westminster, & Amsterdam, Chichester, Galway, Helsinki, London, Manchester, Prague, San José, San Francisco, Seattle, Stockholm ...

Homeopathy

Homeopathic medicines are safe for everyone from newborn babies to senior citizens. Homeopaths effectively treat people of all ages with most conditions, including for example arthritis, varicose veins, constipation, concussion, piles, complaints during pregnancy... We can help where doctors cannot, we try to avoid or reduce the need for antibiotics, steroids or surgery. Emotional, mental or physical problems are treated together. All consultations are confidential. See also Society of Homeopaths leaflets.

Computer Search: Publications

Homeopathy has definitely arrived in the 21st century. For your benefit, I can access over 1000 of the latest and classic homeopathic literature from a computer program which I help to edit. The Society of Homeopaths has published an informative survey of my work with 500 NHS patients - ask me for a copy. I have written many articles and 2 books; visit www.homeopathyhelpline.com/books-by-francis. I have a vast personal library on every aspect of homeopathy.
